Dear Mr. Przybylak,

In 2012, you have installed secty lifePatron® earthquake alert system, security system operates reliably and gives no false alarms.

The system installation purpose is to alert employees on a strong earthquake.

To do so, two sensors were installed in the basement of the building, and a central control panel in our office.

At the request of our employees, sensor sensitivity (threshold value = 02) was set up in accordance with the parameters of the building.

The staff has undergone trial practice by alert signal.

It is due to your system, that we feel safe.

We would like to congratulate you on the innovative and very useful earthquake alert system you developed, and wish secty electronics GmbH future success.

Regards,

Angelina Richter
