«Letter of recommendation»

Dear Mr. Przyblak,

Specialists from Interdnestrcom JSC, in collaboration with your team, have successfully integrated the previously installed earthquake early warning system with the newly deployed system in Tiraspol. The distance between the two systems is approximately 6 km.

The systems were interconnected via an IP-based network, and thanks to our in-house developed software, we have implemented the capability to send emergency SMS alerts to approximately 300,000 people across the republic within seconds.

The full functionality of the integrated system has been thoroughly tested and successfully demonstrated in multiple trials.

We sincerely appreciate your excellent cooperation and your ongoing commitment to enhancing regional earthquake preparedness.

We look forward to supporting future projects and strengthening our collaboration.

Sincerely,
IT-Director

Pozdnyakov Y.
